ICE MERCHANDISERS

Keeping it cool since 1999

Polar Temp is proud to introduce our new line-up of R290 Ice Merchandisers in 2025!

Polar Temp's R290 merchandisers increase energy efficiency by up to 20%, resulting in cost savings. The 2025 models have condensing units with high-efficiency microchannel condensers, and they use a smaller refrigeration charge. Quality is designed and engineered into each merchandiser.

Polar Temp continues to build some of the best-insulated merchandisers in the industry, with two inches of insulation in the walls and an additional inch in the tops and bottoms. Customer safety and satisfaction is extremely important to us. We comply with strict ETL specifications for manufacturing techniques, product safety, and product quality. NSF certification is available upon request.

With over 40 models of ice merchandisers, you can be sure that Polar Temp has the right merchandiser for all locations, both indoors and out!

Polar Temp puts all these features in every box

- Total steel cabinet construction
- Extra Insulation, Extra Value - CFC-free foamed-in-place polyurethane insulation (2" in all walls, 3" in top and bottom)
- Rock hard, high performance polyester finish PLUS a full range of optional contemporary colors
- Sealed, balanced, trouble-free refrigeration system
- Five-year compressor warranty

1000CWGP			105	322					600		

15 amp circuit required for each model

Product improvement may require specifications to change without notice - Weights are crated weights - For depth measurement, add 3.5" for door and handle on upright models - Storage capacity may vary depending on the method of bag tie off, and the size of the ice used. All models are 115 Volt, single phase, 60 hertz - Optional 220 volt, single phase, 50 hertz - AD = Auto Defrost, CW = Cold Wall, G = Glass Door(s), P = Propane (R290 refrigerant)
